3rd March 2017

Infracapital sells its stake in Zephyr to co-shareholder J.P. Morgan

Infracapital, the infrastructure investment arm of M&G Investments, is pleased to announce that it has completed the sale of its 33% stake in Zephyr Investments Limited, a 392MW portfolio of UK wind farms, to its co-shareholder, institutional investors advised by J.P. Morgan Asset Management, for an undisclosed sum.

Zephyr represents one of the largest wind farm portfolios in the UK, with 17 operational wind farms primarily located across the west and north of the UK. The portfolio includes the UK's first major offshore wind farm, North Hoyle.

Since its initial investment in 2007, the partnership has leveraged its significant operational and asset management expertise to enhance productivity and operational efficiencies, such as negotiating new fixed price PPAs and recruiting in-house expertise to drive new strategic initiatives.

This transaction is the latest planned disposal from Infracapital Partners LP as it approaches maturity.

The value of investments will fluctuate and investors may not get back the original amount they invested.
